

J. Nicholas Williams

(678) 313-9010 | josnicholaswilliams@gmail.com

SUMMARY: Creative engineer interested in Product Management/Software Development Roles. Prior and current internship experience has allowed me to showcase my creative abilities and gain industry experience while obtaining my degree.

EDUCATION:

Graduating Senior - Morehouse College – Atlanta, GA

Bachelor of Science – Computer Science, Minor in Mathematics

GPA: 3.3/4.0

Accolades:

- Dean's List (every semester)
- SXSU Scholarship Recipient
- MLK Academic Scholarship Recipient
- Army ROTC 4-Year Scholarship
- Hack GT Participant 2018

SKILLS:

- **Technical Languages:** C++, JavaScript, HTML, CSS, C#
- **Frameworks/Libraries/Tools:** Node.js, React.js, Git, GitHub, NPM, JEST, PowerShell, Windows, Linux, Agile, Scrum, ASP.Net, Telerik

WORK EXPERIENCE:

The Boeing Company

June 2020 – Aug 2020

Software Developer Intern

- Assist the supply chain development solutions team with validating compliance access across various databases.
- Conducted necessary updates to various code-bases across the team (re-routing URL's, etc).

VOYA Investment Management

May 2019 – June 2020

Software Developer Intern

- Assist the architecture team with data migration to Microsoft Azure. Completed an in-depth training on Kubernetes and created and deployed a sample cluster to Microsoft Azure.
- Assist the senior developer with a C# internal reference architecture sample application development teams can use to spin up applications quickly with all of the tooling and framework already implemented.
- Built an ASP.NET Core application using C# to allow modification of Azure Automation Schedules to be turned on or off on the Azure portal via the web app.

CNN Turner Broadcasting

August 2018 – May 2019

Software Engineering / Product Management Intern

- Assist the architecture team to construct a JavaScript metadata structure to be implemented across all of CNN's platforms (Android, iOS, OTT, Web). This data layer captures events from users of CNN.com for better understanding of how content is being digested.
- Developed an internal web application using JavaScript, HTML, CSS, and Node.js to allow product managers and data owners track and request new events to be added to the data layer at any given time.

EXTRACURRICULARS:

- **Georgia State ARMY ROTC**
 - 4th year cadet in the Morehouse College Army ROTC program.
 - Will commission into the Signal branch as a Reserve Officer into the U.S. Army in May 2021.
- **Morehouse Computer Science Club**
 - Primary responsibilities are: AUC outreach, inviting STEM students to create profiles to help with the job search process, as well as attending weekly meetings to discuss opportunities for improvement.
